STAINLESS STEEL BOTTLE

03

Our water bottle comes double walled and vacuum sealed to make sure you experience zero condensation and the temperatures of your beverages last in an insulated chamber.

Water Transfer Printing

Water transfer printing, also known as hydrographics or immersion printing, is a method of applying printed designs or patterns onto a three-dimensional object.

For vacuum sealed stainless steel drink bottle manufacturing and decorating, water transfer is a very good technology choice and supplement. The water bottle using water transfer printing technology is very popular among

We provides pattern customization services. If you need to customize water transfer patterns such as wood grain, jade pattern, then you need to provide artwork in ai, esp or pdf format.
